

REGIONAL TRANSPORT ONLY

A: Calculate Km's from from Depot (Dandenong) to pickup address **(B)**.

B: Calculate and add Km's from the pick up address **(B)** to destination address **(C)**.

C: Then calculate and add the return Km's from destination address **(C)** back to Depot **(A)**.

Total all the Km's then check Km rate on the price rings.

Example: **A + B + C = Total Km's**

There you have it...If in doubt call **1300 888 633**
